Hello everyone. Our names are Raj, Kava and last but not least Codey. We will be talking about a special day which happens every year it is called jeans for genes day. This Friday on the 7th August every student will be welcomed to wear jeans and also bring a gold coin donation to raise funds which helps scientists at Children's Medical Research Institute. They discover treatments and cures, to give every child the opportunity to live a long and healthy life. There is a boy named Robbie. He had 4 major surgeries in the last year – he is only 19 months old. When Jen was pregnant with her second baby, her nineteen week scan found that her baby had a cleft and lip palate. Jack was diagnosed with a rare degenerative metabolic disease Adreno-leuko-dystrophy (ALD) when he was six-years-old.

You can help kids like Robbie & Jack. So far Jeans for Geans has raised approximately $44 509 so we would appreciate as many gold coin donations as possible.
